

SUMMARY

Cybersecurity enthusiast and Application Security Consultant with hands-on experience deploying and managing SAST and DAST solutions. Skilled in strengthening DevSecOps pipelines, performing source code reviews, and conducting web application and penetration testing. Proficient in cloud security concepts and practices. Known for delivering reliable solutions, enabling secure development practices, and continuously exploring emerging security technologies. Seeking opportunities to advance modern application security and support robust digital infrastructure.

EDUCATION

Amity University Rajasthan

Master's Degree in Cyber Security
2021 – 2023

Mahatma Gandhi University Kerala

bachelor's Degree in Cyber Forensics

SKILLS

- Application Security: SAST, DAST, Web App Testing, Source Code Review, API Security
- Tools: Checkmarx, Burp Suite, HCL AppScan, Acunetix, Invicti, Fortify, Snyk
- DevSecOps: CI/CD Security Integration
- Security Knowledge: OWASP Top 10, Secure Coding, CICD, GIT
- Other: Scripting, Customer Support, Project Coordination

CERTIFICATIONS

- Certified Ethical Hacker (CEH)
- Microsoft Certified: Azure Fundamentals
- Checkmarx Certified Partner Engineer
- Checkmarx Certified Partner Professional Services Engineer
- Snyk Certified Implementation Professional
- Snyk Certified Technical professional
- Tenable Certified Sales Engineer (TCSE)
- Tenable Certified Sales Associate (TCSA)
- Cybersecurity & Forensics Certification – NASSCOM
- Ethical Hacking Essentials (EC-Council)
- Cybersecurity Roles, Processes & OS Security (Coursera)
- Introduction to Cybersecurity Tools & Cyber Attacks (Coursera)
- Programming for Everybody – Python (Coursera)

PROFESSIONAL EXPERIENCE

Information Security Engineer

eSec Forte Technologies | Jan 2023 – Present

- Implemented and operationalized application security tools, including Checkmarx, Burp Suite, HCL AppScan, Acunetix, Invicti, and Fortify.
- Delivered customer training on secure coding, tool usage, and DevSecOps best practices.
- Strengthened DevSecOps workflows by integrating security checks into CI/CD pipelines.
- Conducted detailed source code reviews and provided actionable remediation guidance.
- Optimized application security processes and supported clients with technical troubleshooting.
- Collaborated with sales and delivery teams for client onboarding and POC activities.
- Worked on cloud security initiatives with basic hands-on experience in Prisma Cloud.
- Developed automation scripts to streamline complex tasks by leveraging APIs to fetch and process data from various security tools and servers.

Student Intern – Cybersecurity & Forensics

Kerala Police Academy | June 2022 – July 2023

- Gained foundational exposure to cybersecurity operations and cyber forensics.
- Worked on a web application security project using open-source scanning tools.
- Participated in seminars and practical learning sessions.
